The Corrosion Control Professional's Newsletter

NEW LOOK, NEW WEBSITE: SAME INDUSTRY SUPPORT

Blastech is changing but staying the same!

Over the next few months you'll see the new Blastech look more and more. However, one thing that won't change is our commitment to supplying the corrosion control industry with rapid, cost effective solutions for corrosion control challenges.

Continuous customer support improvement

Our mission is to continuously improve our support for your corrosion control activities. As part of this mission, we have recently added two more members to our customer support team, reviewed our freight suppliers performance to ensure faster and more reliable service and we've also increased our stock levels on many of our products to support our delivery promises.

Refreshed newsletter, new website

As part of updating our corporate image, we've also refreshed our newsletter; what was "On-The-Job-Solutions" is now "Blastechniques". The purpose of "Blastechniques" is the same – to provide you, the corrosion control professional, with product innovations, best practice tips and great deals.

We've also recently launched the Blastech website. Visit us to find out more about our extensive product range, access our newsletter archive and order additional copies of our catalogue.

**5 WEBER
BBQs
TO BE
GIVEN AWAY!***

Visit the Blastech website at www.blastech.com.au to see if you qualify for one of 5 giveaway Weber BBQs! Simply match the number on your enclosed cover letter with one of the giveaway numbers on our website and it's yours!

Blastech have 45 years experience providing airspray solutions

After 45 years in the business we know what works and what doesn't. Put our experience to your advantage by phoning us for a tailored airspray solution to meet your challenges.

BUY 2 GUNS, GET THE 2ND HALF PRICE!*

Purchase one gun for industrial coatings and one for finishing!

Graco Airpro

- Superior atomisation for maximum transfer efficiency
- The industry benchmark for finish quality
- Exceptional ergonomics
- Available fluid set-ups: 0.5 to 2.8mm

Devilbiss JGA

- The traditional refinishers gun
- Robust design
- Optional nitralloy heavy-duty needle and nozzle
- Available fluid set-ups: 1.4, 1.8, 2.2, 2.8mm

FREE GUN & HOSE

When you buy a Triton Cart Mount Sprayer!*

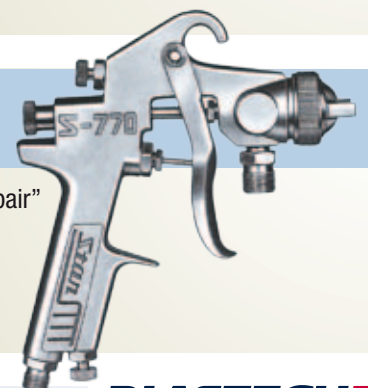

- 50% less pressure fluctuation
- 80% quicker to clean up

Change to a Triton for better finish quality and reduced costs.

Iwata W77

- Precision Japanese design
- Compact industrial spray gun
- Light weight
- Available fluid set-ups: 1.2, 1.5, 2.0, 2.5mm

Star S770

- Budget "replace don't repair" industrial spray gun
- Light weight
- Available fluid set-ups: 1.5, 2.0, 2.5, 3.0mm

SPRAYSMART

Tips and advice for better painting

Size your paintline to match your coating

Use 1/4" paintline for low-viscosity finishing coatings to minimise pulsation. Use 3/8" paintline for industrial coating to maximise flow.

Pressure pots for every budget and application!

Devilbiss KBII

- Industry-leading design
- Paint check valve for protection of regulator
- Premium regulator
- Large capacity
- Large opening for easy cleaning
- Ergonomically designed
- 50psi working pressure

Plus a **FREE Sundstrom Mask** in May/June

Propaint 10L

- Heavy-duty lid
- 4L can will fit inside
- 80psi working pressure

Plus a **FREE Sundstrom Mask** in May/June

Propaint 20L

- Heavy-duty construction
- Available with manual and air-powered agitator
- Removable stainless steel liner
- 80psi working pressure

Plus a **FREE Sundstrom Mask** in May/June

2L Economy

- Budget pressure pot for low-volume applications
- 50psi working pressure

Plus **FREE** pack of 12 nitrile-dipped gloves in May/June

10L Economy

- Low-cost unit for higher production volumes
- 80psi working pressure

Plus a **FREE Sundstrom Mask** in May/June

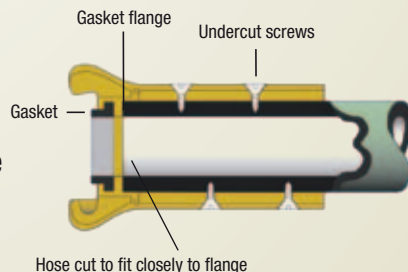

BLASTSMART

Tips and advice for better blasting

How to correctly install couplings and nozzle holders

Detailed below is the correct procedure for installing couplings and nozzle holders with an airtight seal:

- 1** Cut hose end squarely using a Kleencut hose cutter (available from Blastech) or a mitre box and fine-tooth saw.
- 2** Apply a generous bead of silicon to end of hose.
- 3** Fit coupling to hose ensuring hose fits firmly against gasket flange.
- 4** Attach coupling to hose using the correct screws (available from Blastech). As the screws try to penetrate the outer wall of the blast hose they will push the entire hose wall in. When the screws penetrate the outer wall, the threads grip it pulling the hose back up against the coupling. It is important that the screws continue to be tightened until this has happened. Do not over tighten – over tightening will tear the outer cover and cause the screw to lose grip.
- 5** Allow silicon to cure overnight before using hose.

SPECIAL OFFER

Buy 3 lengths of superflex BHS32 or BHS40 Blast Hose and get a FREE Ultra No.6 blast nozzle!*

Introducing our new higher pressure rated Blastech blast hose...

...for safer, higher performance blasting

CHOOSE THE CORRECT BLAST HOSE SIZE

To maintain optimum blasting efficiency the blast hose should have an ID of approximately three to four times the size of the nozzle. For example, if you apply this formula to a Number 7 nozzle, which has a $\frac{7}{16}$ " orifice, then you will require a $1-\frac{5}{16}$ " hose. As blast hose is not made with $1-\frac{5}{16}$ " ID, then the next available size up will be $1-\frac{1}{2}$ ".
